Junior AI Engineer | Backend Engineer @ EasyCM | Anthropic Claude API · Go · React/TS · Python | Full AU Work Rights

PROFESSIONAL SUMMARY

Backend engineer at EasyCM — a multi-tenant WhatsApp CRM SaaS with an async Anthropic Claude API pipeline for conversation summarisation, note structuring, and agent handover briefings. Built Selective Prep, a production AI essay-marking platform where server-side Claude Haiku grades student essays against 6 NSW Selective Test criteria. Previously lifted REST API response time by 22% at Robotics Marketer (Django/MongoDB, 4,000+ users). BIT graduate (Macquarie University, 2025) comfortable ramping up on unfamiliar stacks quickly — shipped production code across Go, Python, TypeScript, PHP, Java, Dart, and C# in under 6 months. Full Australian work rights — Subclass 485, no sponsorship required.

SKILLS

AI & LLM Integration: Anthropic Claude API (Haiku + Sonnet) · Prompt Engineering · Async AI Pipelines · Structured Output Validation · Server-side LLM Integration

Languages: Python · Go · TypeScript · JavaScript · Java · SQL · PHP · Dart · C#

Backend & Frontend: Go (Fiber, Chi) · Django · REST APIs · React · TypeScript · Vite · Recharts

Databases & Infra: PostgreSQL · Supabase (RLS) · MySQL · MongoDB · Redis · Firebase

DevOps & CI/CD: GitHub Actions · Railway · Vercel · Asynq · Docker-ready

Security: JWT + TOTP MFA · Google OAuth · RBAC · HMAC-SHA256 · Rate Limiting

Testing & Practice: PHPUnit · Playwright · Code Reviews · Agile/Scrum

EXPERIENCE

Backend Engineer - EasyCM

April 2026 - Present

Sydney, NSW (Remote) · Multi-tenant WhatsApp CRM SaaS · easycm.com.au

- Architected an async AI pipeline using Anthropic Claude API — conversation summarisation (Haiku), note structuring against custom schemas (Haiku), agent handover briefings (Sonnet), and duplicate lead detection — all via Redis + Asynq background workers so the webhook never blocks.
- Built the full SaaS from scratch: Go (Fiber) backend, React/TypeScript frontend, Supabase PostgreSQL with row-level security, Redis caching, Railway + Vercel deploy, GitHub Actions CI/CD.
- Implemented JWT auth with TOTP MFA, Google OAuth, and 4-tier RBAC (super_admin to agent) — HMAC-SHA256 webhook verification for WhatsApp Cloud API with sub-5-second response.
- Designed auto-ingest: inbound WhatsApp messages auto-create leads, conversations, and message records with zero manual input.

Software Developer Intern - Robotics Marketer

Jul 2025 - Nov 2025

Melbourne, VIC (Remote from Sydney) · Django/MongoDB · 4,000+ active users · Agile team of 7

- Improved REST API response time by 22% — profiled hot endpoints, redesigned MongoEngine query patterns, and added targeted MongoDB indexes.
- Designed and shipped RESTful API endpoints in Django + Python — schema, validation, and frontend integration across the prospect-to-customer lifecycle.
- Optimised NoSQL data models in MongoDB — rationalised schemas, removed redundant lookups, reduced average payload size on high-traffic endpoints.
- Owned production-incident triage on assigned modules — debugged live issues, coordinated rollbacks, and added regression tests.

Operations Associate (Casual) - Chemist Warehouse

Apr 2023 - Present

Sydney, NSW · Concurrent with full-time BIT degree

- 3+ years AU retail/warehouse operations — fulfilled 3,000+* shipments across stocktake, inbound, and outbound flows.
- Trained 4 new starters* on workflows, safety procedures, and store systems.

IELTS Tutor - Taral Sir's IELTS

Aug 2022 - Sep 2022

Ahmedabad, India

- Taught classes of 70-80 students and marked 250+ test papers per week against IELTS band-descriptor rubrics — this rubric-based scoring experience directly informed Selective Prep's AI marking design.

FEATURED PROJECTS

IMMI_CRM - Multi-Tenant Migration & Education Agency CRM - Python (FastAPI) · React/TS · Supabase PostgreSQL (RLS) · Stripe · DocuSeal · Claude API · AWS S3 · Redis/arq

- Built a 13-role RBAC CRM backend from scratch across 30+ FastAPI modules using a five-layer access model (tenant isolation, scope binding, assignment, role capability, field-level encryption) — real Stripe payment links, DocuSeal e-signature routing, and AWS S3 document storage, not mocked integrations.

- Designed an async Claude Haiku pipeline for AI-generated case summaries with cost controls (content-hash dedup, per-account rate limiting) and a Redis/arq background job engine driving scheduled reminders and notifications.
- Verified Postgres row-level security cross-tenant isolation via live integration tests against production Supabase; provisioned 4 real multi-tenant demo orgs (50+ seeded accounts, 150+ business records) behind a platform-level admin view engineered to guarantee zero client-PII leakage across tenants.

Selective Prep - Production AI Essay-Marking Platform - React · TS · Go (Chi) · Supabase PostgreSQL · Claude Haiku API · Vercel · Railway | selective-preparation.vercel.app

- Server-side Claude Haiku integration marks student essays against 6 official NSW Selective criteria — structured prompts, retry logic, and an eval pass to catch hallucinated band scores.
- Full stack end-to-end: spec to API design to prompt engineering to CI/CD to deploy. 9 practice tests, 8 question types, Recharts analytics dashboards with per-criterion trend tracking.

Ikky's Cakes - Live Sydney Client Website - React · Vite · PHP · MySQL · PHPMailer · Hostinger | ikkyscakes.com

- React/Vite frontend (9 entry points) + PHP/MySQL REST API. Security: session fixation prevention, constant-time password comparison, httponly/SameSite cookies, CORS whitelisting.
- Two-layer rate limiting (per-IP + global), hardened file uploads against MIME spoofing and path traversal, branded invoice system with auto-generated order refs and PHPMailer HTML emails.

CricketOracle - ML Match Outcome Prediction - Python · Scikit-learn · Pandas · Jupyter | github.com/PoojanManojkumarPatel

- Supervised ML pipeline predicting cricket match outcomes at 60-70% accuracy — feature engineering across team form, head-to-head history, and venue data. Full lifecycle: wrangling, EDA, training, evaluation.

EasyCM - Multi-Tenant WhatsApp CRM SaaS - Go (Fiber) · React/TS · Supabase RLS · Redis · Claude API · WhatsApp API | easycm.com.au

- Full details in Experience section above. Production multi-tenant SaaS with async AI pipeline, row-level security, and CI/CD.

EDUCATION

Bachelor of Information Technology

Feb 2023 – Dec 2025

Macquarie University · Sydney, Australia

Major: Software Technology | Minor: Data Science | WAM: 70 (Credit)

Relevant coursework: Algorithms, Distributed Systems, Databases, Data Science, Mobile Development, Operating Systems, Computer Graphics, Big Data, Cybersecurity.

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation — Forage (Mar 2026)
