SUMMARY

Results-driven IT graduate with hands-on experience building scalable backend systems and full-stack applications. Strong foundation in Python, Java, SQL, and distributed systems, with practical exposure to API design, database optimisation, and Agile development. Passionate about delivering reliable, secure, and maintainable software solutions.

SKILLS

Programming Languages: Java, Dart, Python, HTML, CSS, JavaScript, SQL, C++, C, C#.

Frameworks & Tools: ReactJS, Django, MongoDB, Firebase, Flutter, MySQL, Git.

Concepts: OOP, Data Structures & Algorithms, Distributed Systems, API Design, Software Architecture, Data Modelling.

Others: Unity, Node.js

EXPERIENCE

Robotics Marketer: Melbourne, VIC - *Software Developer Intern.*

JULY 2025 – NOVEMBER 2025

Tech: Django, MongoDB, MongoEngine, Python, Javascript.

- Delivered backend features for a production web application used by approximately 4000+ users, improving API response efficiency by 22%.
- Designed and implemented RESTful APIs supporting frontend data consumption and asynchronous operations.
- Modelled and optimised NoSQL schemas, improving data consistency and scalability.
- Collaborated closely with frontend developers, product stakeholders, and senior engineers in an Agile environment.
- Participated in code reviews, testing, and deployment preparation, strengthening production engineering practices.
- Managed DevOps tasks: virtual environments, configuration files, and deployment preparation.
- Collaborated with a team of 7, implemented the agile workflow system, followed requirements, and produced clear API and database documentation to support the team.

Chemist Warehouse (Warehouse): Sydney, NSW - *Casual Worker.*

APRIL 2023 – PRESENT

- Operated across all major warehouse functions.
- Demonstrated adaptability by excelling across multiple departments in a fast-paced environment.
- Maintained strong attention to detail, ensuring accurate order fulfillment and safe workflow practices.
- Collaborated effectively with team members to meet daily productivity targets and tight deadlines.

Taral Sir's IELTS: Ahmedabad, India- *Tutor*

AUGUST 2022 - SEPTEMBER 2022

- Assisted students with IELTS exam preparation through targeted lessons and practice sessions.
- Taught and managed classes of 70–80 students, providing feedback and checking over 250 test papers weekly.
- Strengthened skills in communication, clarity, and structured teaching.

PROJECTS

BargainHunter – *Full Stack Application development*

Flutter, Dart, Firebase [github]

- Developed a real-time bargain-sharing app with user login and image-based posts.
- Implemented Firebase Auth, Firestore, and Storage for secure, scalable cloud syncing.
- Added rating, saving, filtering, and sorting functionalities to enhance UX.
- Built the entire app independently, including UI, backend logic, and deployment.
- Implemented secure authentication and role-based access control for the admin and users.

Interactive Frontend Experience – *Frontend Development*

Tech: JavaScript, HTML, CSS, Web Animations [github]

- Designed and developed a fully interactive, game-inspired web experience focused on component-based UI design and event-driven logic.
- Implemented responsive, mobile-first layouts and cross-browser compatible styling.
- Applied performance optimization techniques to ensure smooth animations and fast load times.
- Structured the project using modular frontend architecture for maintainability and scalability.

Cataclysm – *Interactive game development*

Unity, C#, Blender [github]

- Developed 3D space exploration game showcased at Macquarie Astronomy Night for 2 years.
- Created mouse-based joystick controls and asteroid field navigation system.
- Implemented a 10–12 second trail effect enabling creative drawing during gameplay.
- Built C# gameplay logic and custom Blender assets; presented the game live to families.

EDUCATION

Bachelor of Information Technology. – *Macquarie University, Macquarie Park, Sydney.*

FEB 2023 – DEC 2025

Major: Software Technology, Minor: Data Science. Completed coursework in algorithms, distributed systems, mobile dev, databases, OS, graphics, big data, and cybersecurity.

VOLUNTEERING

Student Representative - Comp1010, Macquarie University | Session 2, 2023

- Acted as a liaison between students and unit coordinators, improving communication and providing feedback.

Unity Game Developer - Astronomy Night Showcase, Macquarie University

- Developed and presented the interactive space exploration game described above.
- Engaged with children and families, demonstrating programming concepts in an accessible way.
