Junior Full Stack Developer | Backend Engineer @ EasyCM | Go · React/TS · Python · PostgreSQL | CI/CD | Full AU Work Rights

PROFESSIONAL SUMMARY

Backend engineer at EasyCM — a multi-tenant WhatsApp CRM SaaS built from scratch with Go (Fiber), React/TypeScript, Supabase PostgreSQL (RLS), and Redis. Shipped two live client websites with production CI/CD, security hardening, and automated deploys. Previously improved REST API response time by 22% on a Django/MongoDB app serving 4,000+ users at Robotics Marketer. BIT graduate (Macquarie University, 2025) comfortable ramping up on unfamiliar stacks quickly — shipped production code across Go, Python, TypeScript, PHP, Java, Dart, and C# in under 6 months. Full Australian work rights — Subclass 485, no sponsorship required.

SKILLS

Languages: Go · TypeScript · JavaScript · Python · Java · PHP · SQL · Dart · C# · C

Frontend: React · TypeScript · Vite · Recharts · HTML/CSS · Flutter/Dart

Backend: Go (Fiber, Chi) · Django · Node.js · PHP · REST APIs · Webhooks

Databases: PostgreSQL · Supabase (RLS) · MySQL · MongoDB · Redis · Firebase

DevOps & CI/CD: GitHub Actions · Railway · Vercel · Hostinger · Async · Docker-ready · FTP Deploy Automation

AI/LLM: Anthropic Claude API (Haiku + Sonnet) · Prompt Engineering · Async AI Pipelines

Security & Testing: JWT + TOTP MFA · OAuth · RBAC · Rate Limiting · PHPUnit · Playwright · Agile/Scrum

EXPERIENCE

Backend Engineer - EasyCM

April 2026 - Present

Sydney, NSW (Remote) · Multi-tenant WhatsApp CRM SaaS · easycm.com.au

- Built the full SaaS from scratch: Go (Fiber) backend, React/TypeScript frontend, Supabase PostgreSQL with row-level security, Redis + Async task queue, Railway + Vercel deploy, GitHub Actions CI/CD on every push.
- Designed auto-ingest pipeline: inbound WhatsApp messages auto-create leads, conversations, and message records with zero manual input — HMAC-SHA256 webhook verification, sub-5-second response.
- Implemented JWT auth with TOTP MFA, Google OAuth, and 4-tier RBAC (super_admin to agent). Async Claude API pipeline for conversation summarisation, note structuring, and agent handover briefings.

Software Developer Intern - Robotics Marketer

Jul 2025 - Nov 2025

Melbourne, VIC (Remote from Sydney) · Django/MongoDB · 4,000+ active users · Agile team of 7

- Improved REST API response time by 22% — profiled hot endpoints, redesigned MongoEngine query patterns, and added targeted MongoDB indexes.
- Designed and shipped RESTful API endpoints in Django + Python — full request to controller to ORM to response ownership, integrated with the React/JS frontend.
- Optimised NoSQL data models in MongoDB — rationalised schemas, removed redundant lookups. Owned production-incident triage, coordinated rollbacks, added regression tests.

Operations Associate (Casual) - Chemist Warehouse

Apr 2023 - Present

Sydney, NSW · Concurrent with full-time BIT degree

- 3+ years AU retail/warehouse operations — fulfilled 3,000+* shipments across stocktake, inbound, and outbound flows.
- Trained 4 new starters* on workflows, safety procedures, and store systems.

IELTS Tutor - Taral Sir's IELTS

Aug 2022 - Sep 2022

Ahmedabad, India

- Taught structured prep classes of 70-80 students; marked 250+ test papers per week against IELTS band-descriptor rubrics.

FEATURED PROJECTS

IMMI_CRM - Multi-Tenant Migration & Education Agency CRM - Python (FastAPI) · React/TS · Supabase PostgreSQL (RLS) · Stripe · DocuSeal · Claude API · AWS S3 · Redis/arq

- Built a 13-role RBAC CRM backend from scratch across 30+ FastAPI modules using a five-layer access model (tenant isolation, scope binding, assignment, role capability, field-level encryption) — real Stripe payment links, DocuSeal e-signature routing, and AWS S3 document storage, not mocked integrations.
- Designed an async Claude Haiku pipeline for AI-generated case summaries with cost controls (content-hash dedup, per-account rate limiting) and a Redis/arq background job engine driving scheduled reminders and notifications.
- Verified Postgres row-level security cross-tenant isolation via live integration tests against production Supabase; provisioned 4 real multi-tenant demo orgs (50+ seeded accounts, 150+ business records) behind a platform-level admin view engineered to guarantee zero client-PII leakage across tenants.

Ikky's Cakes - Live Sydney Client Website - React · Vite · PHP · MySQL · PHPMailer · Hostinger | ikkycakes.com

- React/Vite frontend (9 entry points) + PHP/MySQL REST API. Security: session fixation prevention, constant-time password comparison, httponly/SameSite cookies, CORS whitelisting.
- Two-layer rate limiting (per-IP + global), hardened file uploads against MIME spoofing and path traversal, branded invoice system with auto-generated order refs (IKC-XXXXXXX).

Prime Towing & Hauling - Live Sydney Client Website - PHP · MySQL · JavaScript · PHPUnit · Playwright · GitHub Actions · Hostinger | primetowing.au

- Live revenue-generating towing business website. PHPUnit + Playwright test suite on every push via GitHub Actions CI/CD. Automated FTP deploy to Hostinger on merge to main.
- Brute-force-protected admin panel with rate-limiting, account lockout, and DB-backed IP throttling.

Selective Prep - Production AI Essay-Marking Platform - React · TS · Go (Chi) · Supabase PostgreSQL · Claude Haiku API | selective-preparation.vercel.app

- Full-stack platform: server-side Claude Haiku marks essays against 6 NSW Selective criteria. 9 practice tests, 8 question types, Recharts analytics dashboards.

WaterFlo - Custom Domain-Specific Language - Java (lexer to parser to AST to interpreter) | github.com/PoojanManojkumarPatel/WaterFlo--Domain-Specific-Language

- Custom DSL for river-flow and dam-simulation modelling — tokenisation, recursive-descent parsing, semantic analysis, runtime evaluation.

OpenGL Island Scene - 3D Graphics Project - OpenGL · GLSL · Java (LWJGL) · Custom Shaders | github.com/PoojanManojkumarPatel/COMP3170_a3

- Interactive 3D island scene built from scratch — custom shaders, transformations, lighting, terrain rendering, and real-time rendering pipeline.

EasyCM - Multi-Tenant WhatsApp CRM SaaS - Go (Fiber) · React/TS · Supabase RLS · Redis · Claude API | easycm.com.au

- Full details in Experience section above. Production multi-tenant SaaS with async AI pipeline, row-level security, and CI/CD.

EDUCATION

Bachelor of Information Technology

Feb 2023 – Dec 2025

Macquarie University · Sydney, Australia

Major: Software Technology | Minor: Data Science | WAM: 70 (Credit)

Relevant coursework: Algorithms, Distributed Systems, Databases, Data Science, Mobile Development, Operating Systems, Computer Graphics, Big Data, Cybersecurity.

CERTIFICATIONS

Deloitte Australia Data Analytics Job Simulation — Forage (Mar 2026)
